Education

Faculty of Computers and Artificial Intelligence, Benha University

Expected 2028

Bachelor of Science in Computer Science

Experience

React Frontend Web Developer Trainee

2026

Digital Egypt Pioneers Initiative (DEPI)

- Completed 120+ hours of technical training in frontend and web development.
- Built interactive and responsive web interfaces using HTML5, CSS, JavaScript, Bootstrap, and React.
- Currently learning TypeScript, Node.js, Express, Docker, Kubernetes, and software development best practices.
- Practiced Git and GitHub for version control and project management.
- Studied UX/UI principles, code style and patterns, functional documentation, and unit testing.
- Developed practical experience through training modules and a capstone project.

Courses And Certificates

Frontend Web Development Certificate

Creativa

Projects

DEPI Capstone Project | React, Node.js, Express

- Developed a full-stack web application combining a React frontend with a Node.js/Express backend.
- Built responsive user interfaces designed to work across desktop and mobile screens.
- Integrated REST API endpoints to work with dynamic application data.

Community Management Dashboard | Next.js, TypeScript, Git

- Built a responsive dashboard interface using Next.js and TypeScript.
- Worked with mock REST API data to display and manage user information.
- Used Git for version control and maintained the project through multiple commits.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, Arabic (Native), English (Basic)

Frameworks/Backend: React.js, Bootstrap, Node.js, Express.js

Tools & DevOps: Git, GitHub, Docker, Kubernetes

Development Practices: Code Style, Patterns & Best Practices, Unit Testing, Functional Documentation, UX/UI Principles, Prompt Engineering

Extracurricular Activities

Egyptian Collegiate Programming Contest (ECPC) GDG On Campus - Benha University
